

ASSEMBLING INSTRUCTIONS

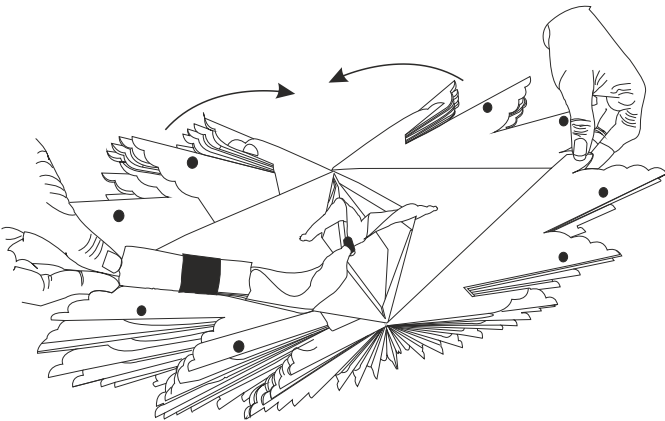

For easier assembling we recommend two people

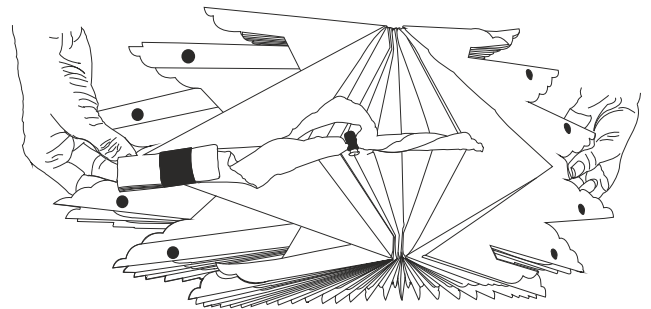

1. Loosen the ribbon

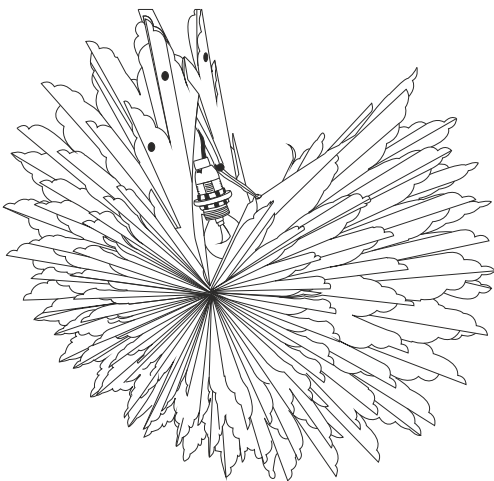

2. Carefully spread the arms of the star apart

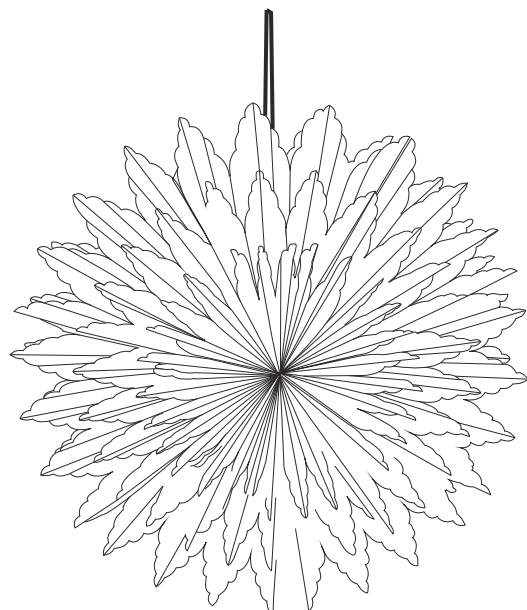

3. Hold the arms and carefully tighten the ribbon. At the same time leave a gap to insert the light source.

4. Pull the ribbon through the hole in the arm, so that it doesn't block the magnets or velcro from closing the star.

5. Place the light source next to the ribbon. Carefully tighten the ribbon and close the magnets.

6. Your star is now ready to be used!
